CHOKES & PARTS

GRM Flow Products offers a complete line of H2, N60, and union choke assemblies and replacement parts. They are available in adjustable and positive style and are compatible with other brands in the market place. All chokes can be easily converted to a fixed flow positive choke and vice versa.

G-H2

Our G-H2 style chokes are available in a variety of sizes from 2 1/16" to 4 1/16" API flange sizes with 1", 2" and 3" orifice sizes. Pressures range from 5,000 - 15,000 PSI. You have a choice of standard hardened steel trim or stainless steel/tungsten carbide trim.

G-N60

Our G-N60 adjustable chokes are 2" line pipe, 3,000 - 5,000 PSI with 3/4" and 1" orifice in standard hardened steel trim or stainless steel/tungsten carbide trim. The G-N60 positive choke accepts both ceramic and tungsten carbide fully lined flow beans.

G-1502

Our G-1502 Hammer Union style chokes are available with 2" or 3" connections with 3/4", 1", and 2" orifice sizes. Available in either 10,000 PSI Sour or 15,000 PSI standard service ratings.
